NEWSLETTER

Summer 2024 Edition

Congrats to the Spring Class of 2024

Lauren Anderson
Bachelor of Science
Mechanical Engineering

Lauren will begin her journey as a professional Production Engineer with Boeing. Her new role will focus on Maintenance, Surveillance and Bombers.

Lauren is relocating to Oklahoma City, but she will not be alone. There are at least two docent alumni working at Boeing in Oklahoma.

We wish the very best to the graduating Class of Spring 2024 as they embark on their career journeys!

Thank you Lauren for spending time interviewing for this newsletter.

On Friday, May 17, 2024, Southern University and A & M College graduated hundreds of students.

Within the mix, was our LIGO Docent Lauren Anderson, who is a first generation college graduate.

Currently, she is working with the Southern University Laboratory's Summer Enrichment Camp, where there are over 100 middle and high school students enrolled in camp.

Lauren said that her experiences as a LIGO docent and as a camp counselor are the "same experience." She stated that LIGO prepared her to expose her camp students to STEM topics and STEM careers in an elementary. When I interviewed Lauren, they were exploring the concept of Carbon Capture with a local chemical refinery company.

Recap: Mix and Mingle

Thank you for attending the Docent Alumni Network private event at Red Stick Social. It was great to see various Docent Cohorts mix and mingle. The Southwest Eggrolls and Shrimp Fettuccine Pasta were a major hit. The bowlers were competitive, and the atmosphere was relaxed. To hear the conversations about upcoming graduates, wonderful careers, and family updates, was encouraging.
